

Overview – Role of an Ambassador

Short term:

The role of ambassador will simply be to help grow awareness of BlockSocDAO to help get numbers into our discord.

We are on an exciting journey to build a global organization that will prepare students for the future of work in blockchain and web3.

To get to this point there are many stepping stones we must cross in the coming weeks and we will be looking to get some capital from one of the many web3 development funds you can check them out [here](#), if you're interested. We will use this capital to build our DAO infrastructure.

Thus, in order to strengthen our application, it is crucial we can build a strong community in our Discord which is the center point of our DAO.

Medium term:

We're planning a call with all ambassadors within the next two weeks where it will be made very clear of the roles and responsibilities, and we can discuss a compensation package for all ambassadors.

How it will work:

We are prepared to pay our ambassadors €1 per discord onboard which will be confirmed by the student verification process in discord.

NB:

- ***What's the quickest way to get students into our discord? –***
- The easiest and quickest way of getting students into our discord is through posting about it through various other discord servers - students are then just one click away from joining.

Therefore, we are targeting Discord communication channels the most.
Sharing it in college group chats or on relevant socials is also very effective.
